(54) Title: IMPROVEMENTS RELATING TO CABLE INSTALLATION

(57) Abstract: A method of installing electrical cabling comprises securing an electrical cable clip (10) to a structure using a fixing element that passes through said clip into the structure, subsequently inserting one or more electrical cables (102) into a cable receiving channel defined by the clip and securing the electrical cables in that channel. The structure will typically be the wall of a building or the like and the fixing element is preferably a nail that is fired through the base portion (12) of the electrical cable clip by means of a nail gun.
